Saba Mengesha forest, shewa, Ethiopia

copyright: [studioantelope.com](https://studioantelope.com)

The first image, Saba-Mengesha Forest in the Central of Ethiopia depicts one of the overall go-green or ecology friendlier public participation led efforts in the country, whereas The chroma key, second image portraying Somali women, is a “color in lay” techniques used to create overlapping effects of two images or two different videos. With this technique one can improve the background color to the first image and replace it with any other image. Both are achievable when there is advancement in the sciences.
